

New Frontiers is

the national entrepreneurial development programme for ambitious early-stage first time entrepreneurs with innovative business ideas which have the potential to scale and provide employment.

It provides the skills training, support, & confidence needed to help you make the leap to starting a successful business.

How does the programme work?

Three phases: Phase 1, 2 and Phase 3

Taking you up to readiness for pre-seed fundraising.

Sectors where TU Dublin has accelerated high potential start-ups include

Software, Engineering, Food innovation, Med Tech, Fin Tech, Augmented Reality, Virtual Reality, Artificial Intelligence, Blockchain, Climate Tech and Sustainability.

This is the right time

to start your business

Phase 2 Programme

Phase 2 – Full-Time (6 Months)

**Location: TU Dublin, Grangegorman Campus,
Dublin 7**

 **Start Date: January 12th 2026**

 **APPLY NOW: <https://lnkd.in/e3zhjemz>**

New Frontiers at TU Dublin Phase 2:

- **Non equity 6 month accelerator participation**
- **Financial support of 2,500 Euro monthly**
- **Commencement of Pre Seed and HPSU investment preparation**
- **A regular entrepreneur series with our alumni start-ups and established SMEs to learn from the best**
- **Experienced investment leaders, serial entrepreneurs and industry experts facilitating the training and advisory sessions**
- **AI workshops to support your use of AI tools to build your business**
- **Connection to our knowledge base of university resources to help you in the planning of your tech build or development of a consumer product**

Describe the market opportunity that you have identified

- What is the size/value of the market? What is the size of your target addressable market?
- Is it a growth market and why?
- Is there an attractive and credible opportunity for your product / service in this market?
- Describe your ideal customer/s : Industry, Sector, Size, Budget of..., Need/Pain, etc
- Are there barriers to entry? Do you have an advantage or protection (e.g. IP)

Objective : to prove that the market is big & growing, ideally not too crowded & that you will have an advantage/opportunity in it

Current or Potential Reference Customers?

- For existing customers :
Describe them (their size, brand name, how they use your product, why they chose it)
- If no existing customers :
Use primary market research feedback to help show there is a market
e.g. “if this product was available.../ this product would save us €X because ...”
Identify potential customers that you have approached and/or plan to approach
- Include a summary prospect pipeline

Outline the key findings from your market research to date

- Summarise research undertaken to date
- Summarise YOUR Key Findings & Market Insights
- Clarify the Market Opportunity : use secondary market research sources to show/prove :
 - Market size
 - Market value
 - Market growth
- Identify research gaps

Who are your Competitors?

- Make a list of all your key competitors
- Gather intelligence & profile them e.g. as follows:
 - Year established
 - Geographic Locations
 - Size employees, Partners
 - Revenue / Profits (annual reports, press releases, blogs)
 - Target Customers / Sectors
 - Business Model
 - Strengths & Weaknesses
 - Your Comparative USPs
- Devise a competitor comparison chart for the short listed competitors – show you know your Market Landscape

CVP /why customers will purchase yours

- Having compared with your competitors, what is your main USP i.e. articulate what is unique & innovative about your offer - from the paying customer's point of view
- What is your value proposition
 - Who is the ideal/target customer?
 - What is the “pain” you are trying/going to solve?
 - How would you put a value on your solution which deals with that customer pain?
 - What value would your customer put on it? Why?
- You need to detail the benefits offered to potential customers and explain why a potential customer will pay for them, and why they would buy from your business rather than from your competitors

Business Model & Revenue Model

- Describe your business model
Online, offline, indirect, direct, outsource
- Revenue Model
Outline the possible income stream/s
How will your business generate/make money
How will you charge your paying customers
How do you see the business growing
- The strategy should support the numbers

Financials

Some financial information is required

These can be indications only, but must be logically linked to the overall Business Case:

- Turnover, revenue, income level – indicative scale

- Main costs/expenditure – salary, suppliers, other

- Potential profitability, margin

- Possible growth levels: e.g. by Year 3 ...

- Amount spent to date, on what, where from

- Future investment required – amount, use, source

Promoter/Team/Advisory Panel

- As the key promoter, outline your relevant qualifications & experience, in terms of commercial background, technical background, management experience & domain knowledge
- Give details of any other team members and/or roles, & outline their relevant experience, qualifications, current/future time commitment
- Give details of any Investors, Shareholders, Advisors & Mentors you have 'on board'

Objectives, Goals & Milestones

- Outline milestones achieved to date
Examples may include customer/s or trial/s secured, market validation, product development, management team in place, investment to date.....
- What are your long-term objectives e.g. revenue, profits, customer targets, community numbers, positioning, partnering, exit plans downstream
- What are your main goals over the next 6 months? How will you measure them (targets, KPIs)?

Objectives, Goals & Milestones
